PROJECTS

TNPC Learning Hub-

Built a full-stack TNPC learning portal using React/Vite with a Node.js backend and MySQL database. Developed REST APIs for managing exam questions, videos, and user data. Implemented a responsive UI with smooth client-side navigation and optimized performance. Designed a scalable architecture ensuring clean integration between frontend and backend services.

Employee-managment-

A full-stack employee management application with authentication, employee CRUD, roles, and task tracking. Built using a Python backend with MySQL database and a clean, responsive frontend.

Booksky-

Designed and developed a dynamic Booksky website, leveraging HTML, CSS, and JavaScript to create an immersive online experience for book lovers

Loginsystem-

Developed a secure login system using Python (backend) and HTML/CSS (frontend) with user authentication and session management

Sanskriti-school-website-

Built a dynamic and responsive school website using HTML, CSS, and JavaScript. Used JSON to manage and display data like announcements, events, and contact info.
